

Multi-core RISC Processor Design and Implementation (Rev. 1.00)

ELEC5881M - Interim Report

Ben David Lancaster

Student ID: 201280376

Submitted in accordance with the requirements for the degree of
Master of Science (MSc)
in Embedded Systems Engineering

Supervisor: Dr. David Cowell

Assessor: Mr David Moore

Revision History

Date	Version	Changes
20/05/2018	3.14	Add background research to appendix.
19/05/2018	3.13	Update abstract to align with guidelines.
19/05/2018	3.12	Fix ISA pseudo-codes.
11/03/2018	1.00	Initial section outline.

Vestibulum pellentesque felis eu massa.

Acknowledgements

I would like to thank my project supervisors Nigel Barlow and Serge Thill for their support and guidance throughout this project.

I would also like to thank James Spalding (Spirent Communications) and firmware team for their encouragement, ideas, and industrial sponsorship supporting this final project.

Declaration of Academic Integrity

The candidate confirms that the work submitted is his/her own, except where work which has formed part of jointly-authored publications has been included. The contribution of the candidate and the other authors to this work has been explicitly indicated in the report. The candidate confirms that appropriate credit has been given within the report where reference has been made to the work of others.

This copy has been supplied on the understanding that no quotation from the report may be published without proper acknowledgement. The candidate, however, confirms his/her consent to the University of Leeds copying and distributing all or part of this work in any forms and using third parties, who might be outside the University, to monitor breaches of regulations, to verify whether this work contains plagiarised material, and for quality assurance purposes.

The candidate confirms that the details of any mitigating circumstances have been submitted to the Student Support Office at the School of Electronic and Electrical Engineering, at the University of Leeds.
